## PROJECTS

### Academic Level

#### A Web Application to Filter the Adult Content in Movies Watchable for Children

Developed a web based application to filter the adult content in movies using deep learning with features like cropping, blurring etc.

- React JS (JavaScript Framework), Python, MySQL

#### Cafe Website And Management System

Developed a web based application for a cafe for online orders and its management. It consists of webpages for customers to surf and subsystems such as administrator, employees and customers. I was involved in developing the customers surfable pages (Front End).

- Angular (JavaScript Framework), Spring Boot (Java Framework), MySQL

#### Apartment Management System

Developed a web based application for an apartment. It consists of subsystems such as employee, owners, tenants, visitors and assets management systems. I was involved in developing the employee management system in it.

- Java, JSP, HTML, CSS, JavaScript, MySQL

#### Hotel Management System

Developed a web based application for a hotel. The system includes room management, and booking management subsystems. I was involved mainly in room management. I was involved in developing the employee management system in it.

- Java, JSP, HTML, CSS, , MySQL
